Ani S.

Product Specialist Radiology
Jakarta, Indonesia

Summary

I have over 5 years of experience in providing high-quality diagnostic imaging services using various modalities, including X-ray, MRI, CT scan, and ultrasound. I graduated with a Diploma of Education in Radiology and Radiotherapy from Politeknik Al Islam Bandung, and I've developed strong technical and interpersonal skills throughout my career especially in MRI, CT scan operation, as well as sales and marketing.

I began my career in clinical settings, working at Pondok Indah Hospital Group and Mayapada Hospital Bandung, where I handled a wide range of patient cases, collaborated closely with doctors and nurses, and focused on ensuring patient safety and comfort. These roles helped sharpen my attention to detail, problem-solving ability, and teamwork in high-pressure environments.

Now, I worked as a Product Specialist for Radiology at PT Fokus Diagnostic Indonesia, where I transitioned from a purely clinical role into a more strategic and commercial one. In this position, I was responsible for promoting and supporting advanced diagnostic imaging products, conducting product training for clients, and bridging communication between technical teams and healthcare providers. This experience strengthened my ability to blend clinical knowledge with product expertise, and further developed my communication, presentation, and customer-focused skills.

I am passionate about staying up-to-date in the field of radiology and committed to making a positive impact whether through patient care or providing solutions that improve diagnostic accuracy and efficiency. I believe my diverse background, from clinical work to product specialization, allows me to bring a well-rounded perspective and valuable contribution to any team I join.
