Karunia Maylin

Business Analyst & Development | Management Graduate | Strategy and Research Driven

Medan, Sumatera Utara, Indonesia

Ringkasan

I am a Management graduate with experience in consulting and corporate environments, focusing on market analysis and structured business research.

During my internship in a consulting firm, I worked on multi-sector projects within governance and public service domains, with a strong emphasis on in-depth research, data synthesis, and building structured analytical frameworks to support strategic decision-making. Prior to that, at United Tractors Pandu Engineering, I supported business development through product support and after-sales preparation for a new product launch, contributing to market benchmarking and customer mapping initiatives.

I aim to build my career in business analysis and strategy-focused roles where analytical rigor and structured thinking translate complexity into direction.

Pengalaman

MARKPLUS, CORP.

Business Analyst

Desember 2025 - Mei 2026 (6 bulan)

Area DKI Jakarta

- Contributed to 6+ cross-sector consulting engagements across state-owned enterprises and national-scale institutions within governance and public service domains.
- Conducted structured market studies and competitive assessments using multi-year datasets, synthesizing fragmented data into strategic frameworks to support decision-making.
- Contributed to sponsorship valuation modeling for national-scale tourism projects by analyzing historical event data, benchmarking market rates, and structuring 10+ valuation components across five sponsorship tiers

- Contributed to organizational development projects through job analysis, competency mapping, and KPI alignment initiatives to address role misalignment and workload imbalance.
- Assisted in large-scale Customer Experience benchmarking initiative covering 100+ enterprises, contributing to research instrument design (7 parameters) and sector-based mystery shopping scenarios across multiple industry clusters.
- Contributed to organizational development projects through job analysis, competency mapping, and KPI alignment initiatives to address role misalignment and workload imbalance.

PT United Tractors Pandu Engineering
Business Development Intern
 September 2024 - Desember 2024 (4 bulan)

- Developed data-driven product support strategies by analyzing market needs and benchmarking competitor services to enhance after-sales solutions.
- Contributed to the development of a maintenance planning model by structuring service intervals and categories based on product usage, time, and distance parameters.
- Built and managed a potential B2B customer database across 9 provinces using Excel and ESDM Geoportal data to support market segmentation and opportunity mapping.
- Standardized and reformatted technical documentation from partners to ensure consistency, clarity, and operational readiness across teams.

SOKO FINANCIAL
Product Development
 Februari 2024 - Agustus 2024 (7 bulan)

- Coordinated influencer-led financial education classes using Agile/Scrum principles to streamline planning and ensure high-quality execution.
- Designed and executed targeted marketing initiatives for Gen Z through partnerships with schools and youth communities, increasing program visibility.
- Collected and analyzed structured participant feedback, compiling findings into reports to inform future product strategies.
- Conducted audience segmentation and market research to identify product gaps and evolving user needs, delivering insights for product positioning.

Gerakan Nasional 1000 Startup Digital
Hustler / Business Strategist
 Februari 2024 - Juni 2024 (5 bulan)

- Conducted market and user research through surveys, interviews, and secondary data analysis to validate business needs and refine value proposition.
- Analyzed user behavior data and evaluated a web-based MVP, generating insights to improve product feasibility and go-to-market direction.
- Facilitated usability testing with 15+ early users and synthesized feedback into structured recommendations to enhance product flow and user experience.
- Developed Business Model Canvas and financial projections, including cash flow planning to assess early-stage business viability.
- Contributed to the development of pitch deck and business plan for final program milestone.
