Summary

I'm an Event Assistant and Project & Research Coordinator supporting event teams with research, costing support, and day-to-day coordination. I enjoy the behind-the-scenes work that helps events run smoothly. I work closely with internal teams, clients, and suppliers to keep projects organised, timelines on track, and communication clear.

Currently growing my experience in the events industry, I'm eager to keep learning, take on more responsibility, and develop into a stronger project and event coordination role over time.

Always happy to connect with event professionals, agencies, and industry peers.
