Python Enthusiast || Data Scientist and Analyst Enthusiast ||
Bachelor of Informatics Engineering (International Class) UMS || Ex
Data Analyst at OUCRU

Sukoharjo, Jawa Tengah, Indonesia

Ringkasan

I am an Informatics Engineering graduate with a strong passion for emerging technologies, particularly in the field of data science. With a big interest in Python programming, I am dedicated to expanding my knowledge and staying updated with the latest advancements in data-driven technologies.

I thrive in both independent and collaborative work environments, understanding the importance of teamwork and clear communication for project success. My ability to connect with people from diverse backgrounds, coupled with my adaptability to changing work environments, allows me to contribute effectively in any setting.

Pengalaman

doctorSHARE / Yayasan Dokter Peduli

Monitoring And Evaluation

Maret 2026 - Present (3 bulan)

Индонезия

- **Data Quality & System Management:** Managed, verified, and ensured the accuracy, completeness, and consistency of Tuberculosis (TB) program data via the Si PINTAR information system. Acted as the regional PIC responsible for data verification and system access management.
- **Data Analysis & Dashboarding:** Analyzed project achievement data using Python and Microsoft Excel, and developed customized performance dashboards in Looker to assist the District Coordinator in tracking targets, evaluating trends, and formulating data-driven corrective actions.
- **Regional Data Management:** Processed, consolidated, and managed incoming TB program data originating from 21 Community Health Centers (Puskesmas) across Pamekasan, Madura.

- **Cross-Functional Collaboration:** Collaborated closely with District Technical Officers (DTO) to support data monitoring for the execution of Systematic Screening for TB (SSTB), MICA, and MICO initiatives.
- **Finance & Administrative Support:** Streamlined the monthly cadre reward distribution by verifying field activity documents (Contact Investigation, Community Outreach, and Patient Treatment Support forms), ensuring smooth and accurate payment processing by the Finance department.
- **Incoming Data Monitoring:** Monitored the continuous flow of incoming field data from Field Coordinators (Korlap), resolving reporting bottlenecks and verifying data integrity to maintain real-time tracking and high validity before final system integration.

- **Managing and Analyzing e-Puskesmas Data:** Monitoring and analyzing the performance data of selected Puskesmas (community health centers) daily to ensure optimal healthcare services. Identifying trends, patterns, and areas for improvement. Occasionally providing support for Dynamic Working Support (DWS) to ensure smooth data management and reporting.
- **Dashboarding for Data Visualization:** Developing and maintaining interactive dashboards that display real-time health data, enabling performance monitoring of Puskesmas and supporting data-driven decision-making.
- **Preparing Reports and Data Insights:** Compiling regular reports that provide insights on Puskesmas performance and offering data-backed recommendations for service improvements.
- **Collaboration with Relevant Teams:** Collaborating with medical teams, Puskesmas managers, and relevant agencies to ensure data accuracy, relevance, and clarity, ultimately aiming to enhance healthcare service quality.
- **Field Visits and Discussions:** Occasionally visiting selected Puskesmas to meet with the head of the health center and healthcare workers, discussing performance, challenges, and opportunities for improvement in service delivery.

PT. Arigani Berkah Sarana

IT Support

Januari 2021 - Juli 2025 (4 tahun 7 bulan)

Boyolali, Jawa Tengah, Indonesia

As an IT Support Specialist, I played a crucial role in supporting the Main Director's operations and enhancing client engagement. My responsibilities encompassed a blend of technical expertise and administrative support:

- **IT Support & System Management:** Provided technical assistance to ensure the smooth operation of company systems, resolving hardware and software issues.
- **Administrative Coordination:** Handle operational tasks, including document handling (e.g., manifests and Festronek), to support regulatory compliance and smooth business workflows.
- **Client Relations:** Represented the company in meetings with prospective clients, delivering engaging presentations that effectively showcased our services and established strategic partnerships.
- **Support for Main Director:** Assisted the Main Director with daily tasks, facilitating smooth operations and timely completion of objectives.

This combination of skills allowed me to effectively contribute to both the technical and administrative aspects of the company's operations, ensuring efficient workflow and client satisfaction.

Angkasa Pura | Airports

Student Internship

Maret 2023 - April 2023 (2 bulan)

Surakarta, Jawa Tengah, Indonesia

As an ICT Intern at Angkasa Pura I, I was responsible for maintaining critical security systems. My contributions included:

- **System Maintenance:** Conducted routine maintenance and troubleshooting for security systems, including CCTV and internet connections, ensuring seamless operation across all platforms.
- **Technical Support:** Provided assistance in identifying and resolving technical issues, thereby maintaining the reliability and security of the IT infrastructure.

Tupai Tech

Design Internship

Februari 2023 - April 2023 (3 bulan)

Jakarta Raya, Indonesia

During my internship at Tupai Tech, I focused on developing my skills in user interface design. My key activities included:

- **UI Design Fundamentals:** Acquired foundational knowledge in creating user interfaces using Figma, laying the groundwork for effective design practices.
- **Design Techniques:** Explored advanced functionalities in Figma to develop professional, user-centric UI designs that enhance user experience.

- Tool Proficiency: Improved my efficiency and creativity in utilizing Figma for UI design workflows, contributing to high-quality design outputs.

Nara Institute of Science and Technology

Student Intern

Januari 2023 - Januari 2023 (1 bulan)

Jepang

In this research-focused program, I investigated the effectiveness of various code search assistants. My key activities included:

- Research Project: Conducted a study titled "How Different are Different Code Search Assistants in Solving Coding Issues? Case Study of ChatGPT, Stack Overflow, and Google Search."
- Data Collection: Gathered data from Python programming tests conducted with undergraduate students to analyze performance metrics.
- Key Findings: Developed visualizations that presented findings on code-switching frequency, program runs, and query usage, concluding that ChatGPT was the most effective assistant for coding issues.
- Outcome: Emphasized the potential of AI tools in enhancing programming workflows and educational outcomes.

Zenius

Studi Independent

Agustus 2022 - Desember 2022 (5 bulan)

Jakarta Raya, Indonesia

I was selected to participate in the Accelerated Machine Learning Program, a Certified Independent Study program offered by Zenius Education, a pioneer in Indonesian EdTech since 2004. This intensive program, verified by Kampus Merdeka, provided comprehensive training in machine learning and data science. My key achievements and activities included:

- Completed 900 hours of rigorous training across five modules, earning 20 SKS (credit units)
- Developed strong foundations in data science, Python programming, statistics, data visualization, and data analysis
- Mastered machine learning techniques, including supervised and unsupervised learning methods
- Gained proficiency in SQL database management and querying
- Conducted a final project involving the creation of a machine learning model for real-world predictive analysis

- Achieved excellent academic performance, with an overall grade of A in four out of five modules

Skills developed:

- Data analysis and visualization using Python
- Exploratory Data Analysis (EDA)
- Machine learning model development and evaluation
- Hyperparameter tuning
- SQL database management
- Scientific writing and critical review of academic literature

This program significantly enhanced my capabilities in machine learning and data science, providing a solid foundation for my career in the field of artificial intelligence and data analytics.
